Device cover is labeled for DIP Switch (EDID setting) and ISP mini USB port and for easy HDMI port recognition especially useful when Mounting Ears are used for fixation.

NOTE: DIP Switch EDID setting index on next page.

EDID Settings: The AC-DA18-AUHD uses a dual rotary style switch to house more EDID's and allow for future expansion. The dual rotary switches can be located on the side of the device, and each rotary is representative of a number in the desired setting, (Left Rotary=DIGIT ONE, Right Rotary=DIGIT TWO). The default mode is "00" which is both rotary switches pointed to "0", in this mode the device copies the EDID from the sink (display) plugged into OUTPUT 1. Custom EDID settings are below.
