

PT-2H HDMI EXTENDER

Thanks for purchasing your Kramer **PT-2H**, an HDMI EXTENDER, which is ideal for multi-media and home cinema applications. It is a user-friendly, easy to install, small matchbox-sized box that extends the HDMI transmission length by regenerating the HDMI signal before it sends the output to the HDMI display or projector.

It lets you extend the HDMI cable distance between the HDMI player and HDMI TV set.

Note, that the Kramer PT-2H is identical to the PT-2HDMI; just the name has changed replacing the suffix “HDMI” by “H” (according to the HDMI Guideline). By placing your **PT-2H** near the display, it removes the digital noise (sparkles) in your picture that may result from using a long HDMI cable. In addition, the **PT-2H**:

- Provides a longer HDMI extension. The **PT-2H** can extend the maximum cable length to up to 30 meters (98 feet)
- Maintains an HDMI single link video resolution of 1080p
- Supports the DDWG standard for HDMI compliant displays
- Is HDCP Compliant

If a DVI device does not seem to function, verify that the device is HDCP compliant. A non-HDCP compliant DVI device will not work with a signal that is HDCP encoded.
