

VGA to 5-BNC Breakout Cable

Analog Performance at it's best. This cable combines the Professional Video world with the world of Home Entertainment. For anyone, who would like their HD display to perform at its best. This Cable is capable of passing resolutions of up to UXGA. This cable was designed to transmit the best picture possible in comparison to other cables. By utilizing a High-Density double shield technology on each one of five signal carriers, this cable will reject a maximum amount of interference. 24k Gold plated connectors will ensure a tight connection. And the conductor, which is made of High-Purity Oxygen Free Copper (OFC), has the characteristics of high conductivity, low signal loss and degradation, low electric resistance and good signal transmission. 5 x 24k Gold plated BNC female to RCA male adaptors included.

Lengths Available:

- 2m(6ft)
- 4m(13ft)
- 5m(16ft)
- 7m(23ft)
- 10m(33ft)
- 15m(50ft)

Colors Available:

- Black

Applications:

This breakout cable is for use with TV's, HDTV's, Plasma screens, LCD displays, Projectors, SAT and Cable Receivers, Video processors, Video Scalers, Computers and much more. (Note: made to work for any application that uses RGBHV type connection).

Specs:

- 5-BNC male to RGB male
- 24k Gold Plated BNC connectors
- 24k Gold Plated RGB connector
- High-Purity Oxygen Free Copper conductor
- High-Density double shielding for max rejection of EMI and RFI
- Nylon Sleeve
- CL2 standard rated
